- **UI/UX Design:** Responsive Design
- **Development Tools:** Visual Studio Code, Postman
- **Operating Systems:** Windows
- **Others:** MS Excel, MS Word.

CERTIFICATIONS

- Name of the course: full stack developer.
- Institute Name: Career X club
- Month & Certified Year: September/2023

PROJECTS:

Food Recipe React-App Description:

- Developed a responsive web application using React.js to help users discover and explore a wide variety of food recipes.
- Implemented a user-friendly interface with search functionality, enabling users to search for recipes by ingredients, cuisine, or dietary preferences.
- Integrated the Edamam API to fetch real-time recipe data, including ingredients, instructions, and nutritional information.
- Designed a recipe detail page to display comprehensive information for each recipe, including images, cooking time, and serving size.

Technologies Used: -

- Front-End: React.js, React Router, HTML5, CSS3, Bootstrap
- Back-End: Edamam API integration
- State Management: React Context API (or Redux)
- Version Control: Git, GitHub

GitHub Repository:<https://github.com/PurushPandrinki/Food-Recipe-React>

Task Manager

Description:

- The "Task Manager" project is a web-based task management application developed using the MERN (MongoDB, Express.js, React, Node.js) stack. It is designed to help users efficiently organize and manage their tasks and to-do lists. This project provides a user-friendly interface for adding, viewing, updating, and deleting tasks, making it an essential tool for improving productivity and staying organized.
- Users can easily add new tasks by providing a title and description.

Technologies Used: -

- Frontend: React
- Backend: Node.js, Express.js
- Database: MongoDB
- State Management: React Hooks
